LONG PEACE

A mechanism to manage security tensions in the Asia-Pacific region

By CARLYLE THAYER

SECURITY CHALLENGES

A few years ago a conference in Sydney promoted an idea that for some time has not been on many people’s minds: the idea of “long peace.”

This essay is part of a collection of papers by leading experts from around the Asia-Pacific region on long peace. It is an attempt to explore the possibility of achieving a long period of peace in the region, given the current strategic environment and the challenges that threaten it.

The authors argue that a long peace is not only possible but necessary for the security and prosperity of the region. They propose a range of strategies and approaches to achieve this goal, including the development of shared norms and values, the strengthening of institutions and mechanisms, and the promotion of dialogue and cooperation among states.

The essays in this collection are a valuable contribution to the ongoing debate on security in the Asia-Pacific region. They provide important insights and ideas for policymakers, researchers, and practitioners who are seeking to understand and address the complex challenges of the region.
