Paper Lantern

## Materials

- Construction Paper
  - Two sheets of any color
- Paper
- Scissors
- Stapler (glue or tape can be used instead)

Optional:
- Markers

Instructions

1. Fold one piece of paper in half longitudinally. While folded cut even strips into the paper. Make sure to not cut all the way through, leave around an inch and a half margin uncut.
2. Unfold the paper and then bring the two ends of the paper met so as to create a cylinder. Stable the ends together to hold the figure together. It should be a bit springy and able to stand on its own.
3. With the second piece of paper repeat step 1, and once unfolded align over the previous cylinder, stapling it together in the same spot. This should give you a double-toned lantern.
4. For the handle, use another piece of paper and cut a small strip off. You can decorate this with markers if desired. Once done, staple the strap onto one of the ends of your lantern. And done!
