## For Tsumami Zaiku:

- [Chirimen Fabric](#)

Though you can get Chirimen fabric, for this craft you can use any cloth. It is easiest to handle fabric that is thin but has some tension when folded. It is possible to use thicker fabric, though you may have to sew or use hot glue for some shapes. A thicker fabric for this activity could be polyester. But for beginners, it is generally recommended to use rayon crepe, which is easy to fold and glue, or thin cotton, which has moderate tension and is easily available.

## For Shrink Plastic:
