Virtual Event Livestream

Broadcast from the comfort of any location, our experienced team of technicians will be on hand every step of the way to help curate, coordinate, and troubleshoot your event and create a broadcast-level production experience for you and your guests. Using upgraded web conferencing software in conjunction with our tricast live streaming encoder equipment, we can assist you in producing and exporting a professional quality product that includes:

- > A production director and technicians
- > Professional video recording/television broadcasting encoding equipment to stream to YouTube or Facebook
- > Web browser support
- > Graphics: lower thirds (names and titles of the speaker), sizzle reel or logo video, picture and picture view with a step and repeat graphic
- > Videos
- > PowerPoint
- > Interactive Q&A
- > Breakout sessions

Hybrid Events Onsite & Digital

A hybrid event enables you to host your program in one of our beautiful spaces while reaching out virtually to a global audience. Safety and social distancing measures are in place to ensure a safe and comfortable experience for each of your guests. We will manage both the onsite AV production as well as the live or recorded broadcast so audiences everywhere have the same great experience.

- > Onsite production director and technicians to produce your event
- > Flexible camera options, from a single camera to multi-camera shots
- > Q&A for live and remote audiences
- > Professional quality enhancements for the digital portion of the event:
 - Professional video recording/television broadcasting encoding equipment to stream to YouTube or Facebook
 - Web browser support
 - Graphics: lower thirds (names and titles of the speaker), sizzle reel or logo video, picture and picture view with a step and repeat graphic
