# **A Future-Ready Workforce: Preparing Community College Students for a Global Economy**

**Faculty Module 7:  
Engaging Industry Partners for  
International Success**

## **Faculty Guide**

**ECMC**

Funded through the generous support of **ECMC** Foundation

Your next steps are:

1. Based on the [business and industry videos](#) in the module, reflect on what you heard about the necessity of global employability skills.
2. Think about the needs of industry in your state to develop a global workforce.
3. Consider how your state or local Chamber of Commerce is focused on talent development for a global economy. Review the [Talent Pipeline Management \(TPM\) Resource Guide for CTE](#).
4. Brainstorm a list of potential organizations or people who could serve as partners for your own pipeline. List ways you can use these industry partnerships to evaluate how your program develops students' global employability skills.
5. Learn more about the [Global Agriculture Learning Center](#) at Hawkeye Community College in Iowa.
6. Research and find ways to get involved in an employer association to expand contacts with global industries in your field.
7. Be sure to check Asia Society's Global CTE [Toolkit](#), including the [Work-Based Learning](#) section, for free tools and resources.

When you have completed these activities, you will be ready for "Faculty Module 8: Internationalizing Work Based Learning."
