**Module 1: Global Career Readiness –
A New Imperative**

Activity Guide

Before moving to the next module, complete these activities:

1. First, understand your local community by collecting data about it. Use the *Mapping the Nation* activity to discover the global connections in your area. Download both the [instruction](#) and the [activity](#) guides.
2. Next, create a 30-second elevator pitch on why it's important to integrate global skills into CTE curriculum. By doing so, you can raise public awareness around education and workforce issues. [Here](#) is a worksheet to help you create your story.
3. Finally, review the Global Career Ready Practices to identify possible connections with your current curriculum. Download the PDF [here](#).
4. Be sure to check the Asia Society Global CTE [Toolkit](#) for free tools and resources.

When you have completed these activities, you will be ready for Module 2: Making Local and Global STEM Connections.
